

Then join us!

Junior Engineer (R&D)/ CAD Designer

We are seeking a motivated Junior Engineer/CAD Designer to join our R&D team, either at our Freiburg im Breisgau location or as a remote contributor, with expertise in CAD design and some knowledge in 3D printing, preferably with familiarity in CREO.

About Us

TRI® Dental Implants is an innovative provider of digital implant solutions based in Switzerland and the developer of **matrix®**, the world's first approved implant for digital restoration without an abutment (intermediate part). Our technology is groundbreaking, pushing digital implantology to the next level.

The **matrix®** implant connection has been specifically designed for new digital manufacturing technologies such as CAD/CAM milling or 3D printing, providing users and patients with a new level of simplicity, aesthetics, and cost advantages.

Responsibilities

- ✘ Create 3D models and technical drawings for various components.
- ✘ Analyse data and situations to develop creative solutions.
- ✘ Validate R&D components using 3D printing technologies.
- ✘ Stay updated on industry and engineering standards.
- ✘ Maintain a record of all designs in the database.
- ✘ Update and maintain design documentations.

Qualifications

- ✘ High proficiency in CAD design, with a preference for experience with CREO.
- ✘ Some knowledge in 3D printing is desirable but not mandatory.
- ✘ Meticulous and precise work ethic.
- ✘ Ability to analyse data and situations and come up with creative solutions.
- ✘ Stay up-to-date on industry and engineering standards.
- ✘ Good time management and organizational skills.
- ✘ Ability to work independently and collaboratively.
- ✘ Team-oriented with a willingness to collaborate with other departments.
- ✘ Educational background or equivalent experience in mechanical engineering, biomedical engineering, materials science, or a related field is a plus.

What We Offer

- ✘ Diverse and responsible tasks in an innovative company.
- ✘ The opportunity to apply your technical skills and knowledge in a practical setting, with the option for remote work.
- ✘ Attractive compensation and the possibility of long-term collaboration.
- ✘ Young and motivated international team.
- ✘ Free beverages and fruits.
- ✘ Engaging company leisure activities.

If you are curious and eager to be part of our growing team, please send your application to jobs@tri-implants.swiss.
